

**Smoke Outlook for 7/29 - 7/30**  
**South Central Oregon - Bootleg Fire and vicinity**  
 Issued at: 2021-07-29 07:55 PDT

**Fire**

The Bootleg fire is at 413,545 acres and is 53% contained. Rainfall from Tuesday helped with the containment a bit, but overall the precipitation had little effect on the fire.

The north and northeast sides of the fire remain the most active. See additional fire information [here](#).

**Smoke**

Winds out of the southwest could blow smoke over the eastern parts of the region. The communities of Silver Lake and Paisley could see elevated air quality today. There is a chance that Silver Lake could see some of the heaviest impacts; the community averaged out at an Unhealthy air quality yesterday, though keep in mind that it was down for much of the day. Elsewhere in the region, expect another generally good to moderate air quality day. Air quality impacts from some of the other nearby wildfires (Jack, Dixie, etc.) continue to be possible.

Daily AQI Forecast\* for Jul 29, 2021

Station	Yesterday hourly	Wed 7/28	Forecast* Comment for Today -- Thu, Jul 29	Thu 7/29	Fri 7/30
Burns	6a noon 6p	●	Generally good air quality today, with air quality peaking at moderate late evening to overnight.	●	●
